

DOT 10 / DOT 15

TRAFFIC MANAGEMENT TERMINALS AND PERIPHERALS ON WEIGHBRIDGES.

DRIVER-FOCUSED ERGONOMICS

- ▼ The 10" or 15" color touch screen is the central point of interaction between the driver and the terminal.
- ▼ The interface is simple and very reactive to cut transaction time to the minimum.
- ▼ The digital intercom is perfectly intelligible even in noisy environments.

SUITABLE FOR ALL TYPES OF TRAFFIC AND SITE CONFIGURATIONS

- ▼ Its design offers installation possibilities for LV, HGV or mixed traffic.
- ▼ Ground mounting systems near the weighbridge or on the wall of a surrounding building are available.
- ▼ The traffic lights and barriers allow for access control to the site if required.

100% TRACEABILITY OF TRANSACTIONS WITH NO RISK OF ERROR

- ▼ Everything is done to limit the need for manual data entry.
- ▼ Numerous automated means of identification can be used (barcode, RFID...) up to license plate reading..
- ▼ Local printing of a paper receipt of the transaction or its sending by email are also possible.

SECURE YOUR OPERATION

- ▼ The housing made of composite material is fixed on a very large support.
- ▼ The refill of consumables does not require opening the housing.
- ▼ Data exchanges are totally controlled.
